
TRINITY FLUIDS

Designed for Quality, Value and Professionals

All Trinity Fluids brands are designed to promote positive results, if used properly. You can choose to not deviate from our instructions or you can experiment with it based on your level of experience and desired personal look and feel you desire.

The following mixing instructions will give the embalmer a successful place to start.

AF Series mixing instructions:

- 4 – 6 ounces of fluid per one gallon of water.
- For trauma condition and difficult cases use 6 - 8 ounces per gallon of water.
- All of our fluids are 6.8 – 7.2 pH. Giving a more natural feel. Review the firmness rating for your specific requirement.
- Complete fixation will occur 10 – 24 hours after embalming depending on cause of death, size of decedent and distribution of fluid.
