
TRINITY FLUIDS

Designed for Quality, Value and Professionals

All Trinity Fluids, LLC brands are designed to promote positive results, if used properly. You can choose to not deviate from our instructions or you can experiment with it based on your level of experience and desired personal look and feel you desire.

The following mixing instructions will give the embalmer a successful place to start.

The **CF Series Cavity Fluid** is a highly concentrated product that requires no dilution when being used to preserve the thorax areas of the body.

Recommended volume to be used:

- CF₁ is a 26 index fluid. It will provide a firmer abdomen.
- CF₂ is a 20 index fluid.
- CF₁ & CF₂ can be used to with any of our AF series products to increase disinfection and stop decomposition of difficult cases.
- CF₃ is Glutaraldehyde & Formaldehyde with no phenol. It is a low exposure fluid. Best used for autopsy viscera and anyone allergic to high formaldehyde fumes. Completely saturate the viscera and close up bag tightly. Use approximately 14 – 16 oz.
